WHAT IS ePMfx

- ePMfx is a project management development platform
- It is based on the PMBOK, PMI’s industry-leading standard for project management
- ePMfx provides the framework to define appropriate project management processes and guidelines that are adapted to the context and needs of your organization
- A standard approach leads to consistency in project implementation across the organization resulting in higher stakeholder satisfaction
- The philosophy behind the development platform is simplicity. Processes are designed for simplicity and work effectively
Project management processes from PMI’s PMBOK can apply to any project lifecycle for your organization.

All projects have a start (initiating) and finish (closing). The planning, executing, monitoring and controlling processes are used throughout the project’s lifecycle.
5 PROCESS GROUPS

INITIATING
- Project Charter
- Stakeholder Register
- Project Approval

PLANNING
- Project Plan
